

# Antibodies for Drugs of Abuse

Antidepressants  
Barbiturates  
Benzodiazepines  
Growth Enhancers  
Hallucinogens  
Opiates  
Stimulants

## New Generation of Antibodies Recognizing Drugs of Abuse and Antimicrobial Agents

The need for accurate detection and monitoring of drug use is in high demand. Drugs of abuse and animal drug residues are a global concern for human health. Research laboratories require premium quality reagents to detect drugs and their metabolites in human and animal samples. Abbotec's sheep polyclonal antibodies recognize with high sensitivity and specificity drugs of abuse, natural and synthetic growth hormones, and antimicrobial agents. The antibodies are perfect reagents for ELISA and laminar flow detection applications.

<b>Anti-Inflammatory</b>	Cortisol, Dapsone, Dexamethasone, Dipyron, Etodolac, Flunixin, Kebuzone, Ketoprofen, Meloxicam, Methylprednisolone, Phenylbutazone, Tolfenamic Acid
<b>Anti-Parasitic</b>	Aminobenzimidazole, Benzimidazole, Diclazuril, DNSH, Ivermectin, Lasalocid, Monensin, Nicarbazine, Thiabendazole, Tolyrazuril, Triclabendazole
<b>Antibiotics</b>	4-Nitrophenyls, Amoxicillin, Bacitracin, Ceftiofur, Chloramphenicol, Fluoroquinolone, Kanamycin, Neomycin, Ormetoprim, Penicillin, Ronidazole, Streptomycin, Sulphadoxine, Sulphanilamide, Tobramycin, Virginiamycin
<b>Antidepressants</b>	Amitriptyline, Desipramine, Escitalopram, Imipramine, Nortriptyline
<b>Barbiturates</b>	Cyclopentobarbital, Phenobarbital, Secobarbital
<b>Benzodiazepines</b>	Diazepam, Lorazepam, Nitrazepam, Oxazepam, Temazepam
<b>Growth Enhancers</b>	Androstenedione, Boldenone, Clenbuterol, DHEA, 17a/b Estradiol, Estriol, Flumethasone, Gestrinone, Hexestrol, Isoxsuprine, Megestrol, Progesterone, Ractopamine, Salbutamol, Testosterone, 17a/b Trenbolone, Zilpaterol
<b>Hallucinogens</b>	Lysergic Acid Diethylamide (LSD), Mescaline, Phencyclidine (PCP), Salvinorin, Tetrahydrocannabinol (THC)
<b>Opiates</b>	Buprenorphine, Codeine, Fentanyl, Hydrocodone, Meperidine, Methadone, Morphine, Oxycodone, Propoxyphene, Salvinorin A, Tramadol
<b>Stimulants</b>	Amphetamine, Cocaine, Methamphetamine
